

Trading Calls

BEL BUY 20th February 2020

Scrip is undergoing a consolidation in the longer time frame and is on the verge of resuming its prior trend. Formation of double bottom price pattern on daily chart suggest short term momentum to the uptrend. The momentum indicator MACD has crossed the signal line indicating a start of a trend. Positive divergence in RSI indicating positive momentum on north side. We recommend a BUY in BEL around 83-85 with a stop loss of 79 and aim for a target of 94 and 98 levels.

BODALCHEM BUY 18th February 2020

After making double bottom near 67, the stock is giving a good pullback rally since last few days. Currently it is trading above all the major DMAs (50, 100 & 200). A 'Golden cross' between 50 & 100 DMA is also forming. So some more upward rally is very likely in the stock in short term.

HAVELLS BUY 04th February 2020

After making double bottom, the stock started to give pullback rally. Positive divergence in RSI & Stochastic are indicating of some fresh up move in the short term.

PNCINFRA BUY 23rd January 2020

Scrip is undergoing a consolidation in the longer time frame and is on the verge of resuming its prior trend. Formation of cup and handle pattern on weekly chart suggest short term momentum to the uptrend. The momentum indicator MACD has crossed the signal line indicating a start of a trend. The RSI too is above its key 50 mark indicating positive momentum on its side. We recommend a BUY in PNCINFRA around 190-193 and a lower towards 178-182 with a stop loss of 166 and aim for a target of 225 and 250 levels.

WIPRO BUY 04th December 2019

The stock has witnessed a decent correction recently from the peak of 300 and took a halt near line of polarity while forming double bottom pattern on daily chart. RSI turned from oversold zone and MACD has indicated a reversal to maintain a positive bias which is showing potential to rise further in the coming days. With the chart looking attractive and decent volume participation witnessed, we recommend a buy around 238-234 and on dip towards 224-228 in this stock for an upside target of 260 & 270, keep a stop loss of 218 on closing basis.

Market	Value	% Change
SGX Nifty (at 8.00 am IST) prev closing	11414.00	-1.68%

Nifty Key Levels For The Week

Support	S1: 11530	S2 : 11450
Resistance	R1 : 11665	R2 : 11780

Market Outlook

Nifty succumbed to selling pressure immediately after opening on a flat note. The Indian market has been moved to a Downtrend, as it breached its previous low of 11614. However, in the second half of the session, there was a short-covering rally which helped Nifty to pare some of its losses. Yesterday's session was volatile due to the expiry of futures & options contracts of the February series. Formation of hammer with positive divergence in RSI are giving cues of bounce back. If nifty cross and hold above 11665, then bounce back is expected towards 11780 & 11880 in coming sessions. However, failure to cross and sustain above 11665 level, can push lower till 11530 & 11450 levels on downside.

VIEW

Domestic market witnessed a week of consolidation on the expected line as red and green candles were in a tug of war for dominance. Indices started this week on a negative note on the back of unsupportive global cues and slipped lower but reversed after two days of struggle. Bulls appear to be defying bearish technical parameters for the time being as indices still holding their crucial supports which suggest bullish undertone will be continued in the near term also after facing initial hurdles. As of now, market participants are looking forward for the meeting between Trump and Modi as this meeting will be the next trigger for the market.

Technical Outlook-

- a) Formation of Hammer after the formation of Doji candle on weekly chart indicate dilemma in the mind of market participants
- b) While appearance of **Abandoned baby bottom** on daily chart giving edge to Bulls
- c) The momentum oscillator RSI seems to be flat but positive crossover in stochastic on daily chart are in favour positive move on upside
- d) Although nifty is meandering near the resistance zone (78.6 % and 61.8% Fibonacci retracement) which is a **make or break situation**
- e) If the bulls wants command, they will have to push the index beyond 12255 levels on a sustainable basis. Above which, it can extend up to 12400 levels.
- e) However, a break below 11900 levels can push down towards 11780 levels.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

	NIFTY LEVEL	JUSTIFICATION

Support 1	12020	Low of Abandoned Baby Bottom
Support 2	11780	Previous Swing Low

VIEW

Banknifty gave a range bound and choppy movement throughout last week and closed the week with a net gain of 0.3% over its previous week's close. Most of the banking stocks remained subdued. However, some buying interest was witnessed in SBI and Axis Bank and they closed after gaining 2.5% & 1.2% respectively.

OBSERVATIONS:

- 1) Banknifty is consolidating in between 50 DMA and 200 DMA since last couple of weeks.
- 2) Stochastic has reached at the oversold zone.

It is witnessing that Banknifty is moving in between 30140 and 31680 since last couple of weeks. trading is the prudent strategy So at this juncture and fresh momentum on either side would be expected after breaching this range.

CHART ANALYSIS

SUPPORT & RESISTANCE LEVELS

RESISTANCE/SUPPORT	BANKNIFTY LEVEL
Resistance 2	31680
Resistance 1	31305
Close	30943
Support 1	30590
Support 2	30140

VIEW

Rupee continued to trade in a narrow range throughout the week with upside remain capped. Sustained outflow of foreign fund and coronavirus fears dampened the investors sentiment. However softening in crude oil prices on renewed concerns about demands being pinched by the economic impact of the coronavirus outbreak, while OPEC and its allies appeared to be in no hurry to make additional production cut has supported the domestic currency. For the coming week, rupee is likely to trade in a sideways trajectory with upside capped due to weak domestic economic data.

TECHNICAL FACTORS-

- a) Formation of bullish candle near rising trendline on weekly chart suggest weakness in rupee
- b) From last few months, pair has been trading around 61.8 % fibonacci retracement of its slump measured between 74.50 and 68.28 mark at 72.15 mark. Therefore, the latest advance could be considered corrective for rupee
- c) Technical indicators with flat MACD hovers within neutral levels lacking directional strength
- d) Upside will only possible if the pair sustains above 72.15 with scope then to correct towards 72.40 first and 72.65 later
- e) Firm support lies at 71 followed by 70.50 mark

STDC BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Weekly chart of GAIL reveals that demand is increasing and supply is diminishing. Channel support line from lower levels is displaying trend reversal and creates buying opportunity at current juncture. As of now, stock is taking support from its ascending triangle resistance line on monthly chart which augur well for the Bulls and indicate surge on upside. Apart from this, rising Histogram in MACD daily signals optimism, which further suggest upside move in the counter in coming sessions. BUY GAIL AROUND 140-145, ON DIP 120-125 SL 110(CLOSING BASIS), TARGET 180-200

Crude oil prices shot up by 5% in yesterday's session stood at \$63.86/bbl after the US airstrikes at the Baghdad International Airport. It killed Iran's general manager Qasem Soleimani who is the leader of Islamic Republic's elite Revolutionary Guards.

Also, the same attack killed the Iraq's Abu Mahdi Al-Muhandis, the deputy commander of the Iran-backed militias reported Reuters. This airstrikes has exacerbated the already heightened tensions in the Middle East. Tensions have been increasing between Washington and Iran after an Iran-backed Iraqi militia stormed the American embassy in Baghdad to protest deadly U.S. airstrikes earlier this week.

Iran officials have said they will give an immediate response to Washington over the attack further escalating tensions between the two countries Iran and United States. If the conflicts spread to the oilfields, we could see the shutdown of oil production in the region.

Looking at the demand supply scenario, OPEC+ nations has curtailed its oil production by another 2.1 million barrels as discussed in the previous OPEC meeting in December 2019. From starting this month, OPEC is also expected to increase their reduction in output. The global demand supply of oil is estimated to remain balanced and show a surplus of just 0.4 mbpd in the Q1 2020. However, demand prospect remains dim.

The recurring attacks on oilfields and oil producing countries are the upside risk to the oil prices. Last year, Saudi oil facilities and oil tankers were targeted by the enemies. Any attack on five big OPEC producers will be the risk to the oil prices. With rising Middle East tensions, there is a threat to the global energy exports if the Strait of Hormuz is anytime on the list. This strait is the largest and the crucial shipping route will always remain in focus when tensions like these flare up.

At present, the front month Brent-WTI spread opened at \$5.65/bbl, widest since November. Currently, the Dec 2020 future contract is trading at a backwardation of \$5.05/bbl as compared to \$4.66/bbl over previous week. It means current month prices are trading at a premium and indicates that the market is expected to remain tighter in future.

Taking above situation into consideration, if the Middle East tension rises we can see huge spike in oil prices in the months to come. With the balance demand supply and improving US-China trade relations we can expect further upside in oil prices is unavoidable. Therefore, we expect Nymex Crudeoil prices to remain supported at \$60/bbl and extend its higher move towards \$68-70/bbl in the first quarter of 2020.

Top Picks for 2019-2020

NICKEL

Nickel prices has risen by more than 60% on worries over supply tightness after the Indonesia announced an export ban on nickel ore from Jan 2020, two years earlier than expected. Moving into next year, Nickel prices may remain supported at Rs 1100 levels and trade higher towards 1400 levels in 2020.

GOLD

MCX Gold prices have witnessed a surge of 21% since last Diwali on account of 15-month long trade tension leads to soft economic growth, monetary easing by the central banks, increasing investment demand from ETF and Central banks buying and Brexit uncertainty. Investors started to lock in gains starting June and in the span of four months gold prices rocketed 15% and made a high \$1566/oz.

U.S. Fed policy makers will review their stance at a meeting on Oct. 29-30 amid speculation that they are set to deliver a third consecutive interest rate cut. Currently even negative interest rates and easing monetary policy is unable to spur the economic activity to balance the Debt to GDP ratio. During the short term, Gold prices may face headwind due to trade optimism and higher bond yields however, for the long term, one must mandatorily add gold in their portfolio due to uncertainty over global economic outlook. We expect Comex Gold prices to test \$1,650 in the coming year 2020.

CRUDEOIL

Crude oil prices are mainly supported by the efforts of OPEC members, same way as it helped falling oil prices in 2016 by introducing production cuts. Crude oil prices managed to rise 21% YTD despite record production from US and persistent demand worries.

OPEC+ nations have planned to discuss on reducing further production in the 5th Dec 2019 policy. This meeting will be deciding factor for the future direction of oil prices.

Disclaimer:

This report has been prepared by Narnolia Financial Advisors Ltd. (NFAL) and is meant for sole use by the recipient and not for public circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of NFAL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult his/her/its own advisors to determine the merits and risks of such an investment. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. NFAL will not treat recipients as customers by virtue of their receiving this report. Neither the Company, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits or lost opportunities that may arise from or in connection with the use of the information/report. The person accessing this information specifically agrees to exempt NFAL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold NFAL or any of its affiliates or employees responsible for any such misuse and further agrees to hold NFAL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject NFAL & its group companies to registration or licensing requirements within such jurisdictions.
