

### VIEW

From last four weeks, USDINR pair has been gyrating within the range of 1Rs 15 paise. Although it traded with positive bias and ended with minor gain due to the capital inflow in equity. However, stage of congestion after upside momentum prevails and pair is still awaiting breakout on either of side. Though the prices are trapped in a narrow range but the Bulls are looking strong as this sluggish movement is happening in the area of Bulls which indicates higher targets in coming days.

#### TECHNICAL FACTORS-

- a) Consolidation above rising trendline support of 74.90-75 zone suggest sideways to positive move further
- b) Higher trough and higher crest phase is still intact and this subdued phase is preparing the bulls for next leg of rally
- c) Nevertheless negative crossover in MACD can rein the upside move for a while
- d) Immediate resistance still stands at 76.15 from where pair can extend up to 76.50 and 77.10 mark where it can face stiff resistance
- e) Strong support lies at 75-74.90 mark followed by 74.30 mark
