The SIP inflows saw a decline in the monthly flows for a second month in a row. The SIP Inflows for the month of May came in at Rs.8123 crores as compared to an inflow of Rs 8376 crores in April. Large Cap funds & large and mid cap funds have seen inflows to the tune of Rs.1555 crore and Rs 703 crore. Mid Cap funds & Small Cap funds witnessed muted inflows at Rs.279 crores and Rs. 293 crores respectively. Debt fund investors have remained cautious in deploying more money after the Franklin fiasco and have thus remained invested towards safer funds, namely Liquid funds and banking & PSU Funds. Arbitrage Funds, considered as safe options have seen high inflows in the month of May worth Rs. 10806 crores. Balanced Funds in the hybrid category saw outflows worth Rs. 978 crores on high under performance and low dividend payout.

**SBIN****BUY****08-Jun-20**

NII growth during the quarter was affected Primarily on account of Loan growth Moderation. The NIM has remain steady but management does not see any major upmove in it in near terms. The loan growth is expected to subdued in near term given the current economic condition. The bank has offered the moratorium to 100% customers in phase 1 and will do the same in phase 2 to ,however moratorium has been availed by around 22% of the customers till now. The Other income growth is expected to be subdued given the pressure on Forex income and recoveries which will hinder the Operating profitability and Excessive provisions should effect the Bottom line. However with strong liability franchise well diversified loan portfolio and healthy capital adequacy ratio we expect the bank to get through the tough phase. Bank is currently trading at 0.7X FY21E. We maintain BUY with TP of 240 at 0.9XBV FY21E.

**ALKEM****BUY****08-Jun-20**

The weak domestic business in 4QFY20 due Covid related lockdown dragged the overall revenue growth. US have grown quite significantly on account of new product launches & market share gain in existing products. The gross margin has contracted by 180 bps YoY on account of the business mix with the increased revenue contribution from the International market. With the slowdown in the prescription generation due to deferment of elective surgeries & shut down of OPDs, the domestic business has been severely impacted, as 40% of the domestic revenues consist of anti-infectives. The company had a muted start in FY21, but we believe as the lockdown is relaxed in various states of the country, the growth will revive. US business crossed US\$ 300 mn revenue mark in FY20 and break-evened as well, we believe US will continue to grow with 10+ launches expected in FY21. On the margin front, the operating leverage in the India chronic & US business, increased field force productivity and higher utilization of recently added capacities will remain major growth driver for the expansion in the EBITDA margin going ahead. Therefore, we increase our rating from ACCUMULATE to BUY at a target price of Rs.2764

**MASFIN****NEUTRAL****08-Jun-20**

AUM growth has remained almost steady sequentially with higher provisioning affecting the profitability. Management has provided conservatively with COVID related provision standing at Rs 20 Cr which is 25% of the SMA 2 number (Rs 82 Cr.) Management is confident of growth with 56% of its customers being MSME which is catering to smaller industries where revival is expected with the removal of the lockdown. Management has already opened 96 (105 total) branches and plans to start disbursement in the month of June. Though management stated 65% of its branches are in rural & semi-urban but we remain cautious as more than 65% of its total branches are in Gujarat and Maharashtra with higher red zone areas. We expect credit costs to remain on a higher range going forward. The stock is trading at 2.7x FY21. We maintain NEUTRAL at 559.

**CHOLAFIN****NEUTRAL****08-Jun-20**

CHOLAFIN had a fairly subdued quarter, the operating performance of the company which was below our expectation. NII grew by meagre 13% on account of Moderation in loan growth and Below Par NIM mainly on account of Higher Liquidity. The profitability of the Company took a big dip as a consequence of the Proactive COVID 19 and MACRO provisions. Asset quality of the company deteriorated with stress in the CV segment and lockdown affecting the collection efficiency. 76% of the company customers have availed the moratorium which might hinder the asset quality going forward and thus increasing the credit cost which would impact the bottomline. Company is trading at 1.3X BV FY21. We change to Neutral with TP of 164.

- ❑ In FY-20, PVR's Total Income increased by 11% (Y-o-Y) to 3452 crores.
- ❑ March month severely impacted business growth of PVR for full year FY-20, from Mid of March Cinema Halls were asked to shut down its operations due to COVID, zero business done by PVR in last 12-15 days of March and many people stopped visiting to cinema Halls & Malls from 1st week of March due to COVID, so full month of March witnessed very low footfall. - ❑ In Q4, Revenue declined from all source i.e. Movie Exhibition, Advertisement, Convenience Fees and F&B, as all are correlated and it impacted total revenue in FY-20.

**Impact on Profitability**

In FY-20, PVR reported PAT of 26.85 vs 189.4 crores, declined by 85.8% (Y-o-Y)

- ❑ Issue of Movies Releasing on OTT Platform
- ❑ During lockdown, few movie producers have taken decision of releasing movies directly on OTT platforms.
- ❑ Management is of view that few producers have their own prior commitments that's why they are releasing earlier on OTT platforms. Company is in touch with all leading Production houses, around 90-95% has told; they will release their movies first on Theatrical platform only.

- IGL has 60 lac households & 2000 CNG stations as of date. As per the management, the CNG station is expected to be 5 times & households will be 7 times or more in the next 7 years.

- The emergence of electric vehicle will take time due to lack of charging infrastructure & there is no regulatory & legal framework in place. Therefore, no adverse impact is expected from the electric vehicle in the medium term.
- The Govt's focus is on improving the gas usage, broad basing the gas availability & customers profile that's why it is sticking to the APM prices.
