Quote of the Day : "I would not pre-pay. I would invest instead and let the investments cover it"

**TATAMETALI****NEUTRAL****12-Jun-20**

Reduced raw material prices and margin expansion sequentially on the back of benefits arrived from commissioning of Oxygen and PCI plant in FY20. However, the same will not be sustainable completely in 1QFY21 due to the year's low raw material prices will not be available further and due to COVID operations started in May-20 with only one blast furnace. From June both the blast furnace was operational. Delay in expansion plan through debottlenecking in DI pipe business also affected due to current pandemic. Thus, our stance of NEUTRAL with the target price of Rs. 500 at 4.6 times EV/EBITDA of FY21E.

**Mutual Fund - Fund Flow****MACRO****10-Jun-20**

The month of May'20 saw equity mutual funds inflows at Rs 5256 crores a fall of 15% MoM after witnessing an inflow of Rs 6217 crores in April'20. The SIP inflows saw a decline in the monthly flows for a second month in a row. The SIP Inflows for the month of May came in at Rs.8123 crores as compared to an inflow of Rs 8376 crores in April. The mutual fund's equity segment has seen most of the buying towards funds who have a large cap bias in them. Large Cap funds & large and mid cap funds have seen inflows to the tune of Rs.1555 crore and Rs 703 crore. Mid Cap funds & Small Cap funds witnessed muted inflows at Rs.279 crores and Rs. 293 crores respectively. Debt fund investors have remained cautious in deploying more money after the Franklin fiasco and have thus remained invested towards safer funds, namely Liquid funds and banking & PSU Funds. Arbitrage Funds, considered as safe options have seen high inflows in the month of May worth Rs. 10806 crores. Balanced Funds in the hybrid category saw outflows worth Rs. 978 crores on high under performance and low dividend payout.

**SBIN****BUY****08-Jun-20**

NII growth during the quarter was affected Primarily on account of Loan growth Moderation. The NIM has remain steady but management does not see any major upmove in it in near terms. The loan growth is expected to subdued in near term given the current economic condition. The bank has offered the moratorium to 100% customers in phase 1 and will do the same in phase 2 to ,however moratorium has been availed by around 22% of the customers till now. The Other income growth is expected to be subdued given the pressure on Forex income and recoveries which will hinder the Operating profitability and Excessive provisions should effect the Bottom line. However with strong liability franchise well diversified loan portfolio and healthy capital adequacy ratio we expect the bank to get through the tough phase. Bank is currently trading at 0.7XFY21E. We maintain BUY with TP of 240 at 0.9XBVFY21E.

**ALKEM****BUY****08-Jun-20**

The weak domestic business in 4QFY20 due Covid related lockdown dragged the overall revenue growth. US have grown quite significantly on account of new product launches & market share gain in existing products. The gross margin has contracted by 180 bps YoY on account of the business mix with the increased revenue contribution from the International market. With the slowdown in the prescription generation due to deferment of elective surgeries & shut down of OPDs, the domestic business has been severely impacted, as 40% of the domestic revenues consist of anti-infectives. The company had a muted start in FY21, but we believe as the lockdown is relaxed in various states of the country, the growth will revive. US business crossed US\$ 300 mn revenue mark in FY20 and break-evened as well, we believe US will continue to grow with 10+ launches expected in FY21. On the margin front, the operating leverage in the India chronic & US business, increased field force productivity and higher utilization of recently added capacities will remain major growth driver for the expansion in the EBITDA margin going ahead. Therefore, we increase our rating from ACCUMULATE to BUY at a target price of Rs.2764

**MASFIN****NEUTRAL****08-Jun-20**

AUM growth has remained almost steady sequentially with higher provisioning affecting the profitability. Management has provided conservatively with COVID related provision standing at Rs 20 Cr which is 25% of the SMA 2 number (Rs 82 Cr.) Management is confident of growth with 56% of its customers being MSME which is catering to smaller industries where revival is expected with the removal of the lockdown. Management has already opened 96 (105 total) branches and plans to start disbursement in the month of June. Though management stated 65% of its branches are in rural & semi-urban but we remain cautious as more than 65% of its total branches are in Gujarat and Maharashtra with higher red zone areas. We expect credit costs to remain on a higher range going forward. The stock is trading at 2.7x FY21. We maintain NEUTRAL at 559.

### MGL 4QFY20 Concall highlights

- ❑ On account of the nation-wide lockdown, the operations were impacted except for the gas used in the household kitchen.
- ❑ With the partial easing of the lockdown – the sales volumes is expected to gradually improve due to increased vehicular movements, opening of the restaurants , commercial establishments & other business that uses gas.
- ❑ In the initial days of lockdown in the month of March 2020, the sales volume was down by 20% of the normal volumes i.e., 25-30 MMSCM. The daily sales volumes have increased from 25% in April 2020 to 42% in June 2020 compared to normal volumes recoded in the pre-lockdown period.
- ❑ The company is rapidly expanding its CGD network in the existing license areas during the quarter. 32852 domestic households & 24 industrial/commercial customers were added this quarter.
- ❑ In the Raigarh GA- the company added more than 4200 domestic PNG connections in the quarter and was able to fulfil the minimum work programme target of providing PNG domestic connection. 14 CNG stations are operational in this area with the average sales reaching 38000 kg/ day in the pre-lockdown period.
- ❑ The industrial segment business has picked up really well, bigger establishments & restaurants are still facing challenges & will take relatively more time to be normal compared to others. The company expects CNG segment to bounce back quickly post the easing of the lockdown.
- ❑ The main driver for the EBITDA margin this quarter was the improvement in gross margin on account of lower spot gas prices during the quarter compared to previous yr.
- ❑ As per the company, the growth of the infrastructure won't be hampered. However, the mobilisation of contractors & migrants labourers, permission from housing societies & from other authorities could pose some challenges.
- ❑ Annual capex of 450-500 crs is expected going forward.

### TATAMETALI 4QFY20 Concall Highlights:

#### **COVID impact on business**

- ❑ Fall in DI pipe volumes by 25% YoY due to shutdown, lockdown and disruption in supply chain management despite order lined up by management.
- ❑ Sales dispatches got hit because of lockdown.
- ❑ Towards end of April dispatches was allowed (interstate dispatches) and from 10-May onwards production started with one of the blast furnaces of DI pipe.
- ❑ From 1ST Jun manpower was allowed at 100% the DI pipe production ramped up and 2ND blast furnace was also started as well.
- ❑ DI iron performing well and PIG iron is still subdued due to shortage of labour, lower demand in auto industry and other engineering, 2ND blast furnace was started from 10TH June which could not benefit much.
- ❑ Currently ramping up of DI pipe is at 80-90% and for PIG iron it's 50% utilization level.

#### **Financial Performance**

- ❑ Pig iron and DI pipes volume during the quarter was 79500 T and 54000 T respectively.
- ❑ EBITDA margin expansion during the quarter was on account of sales volume of PIG iron (up 13% YoY), improved operational performance in both Pig iron and DI pipe division.
- ❑ 10-15% reduction in cost benefit in 4QFY20 sequential is not sustainable. The reduction was on account of reduced raw material prices, usage of coal inspite of coke, yet part of its will be sustainable.
- ❑ Replacing coke with coal injections post commissioning of Coal injection plant a year back helps in expanding margin.
- ❑ Oxygen plant was also commissioned 6-8 months back also helped in improving operational performance.
- ❑ Reduction in coke cost by around 8% sequentially increased the spread between net revenue and EBITDA during the quarter.
- ❑ Pig iron prices went up by 7% and DI pipe prices by 3% sequentially however, DI pipe orders are more stable as compare to Pig Iron and they are based on long term contracts.
- ❑ Pig iron prices are directly impacted by the raw material prices. However, in 4QFY20 it was not impacted much due to shortage of raw material supply.
- ❑ A consultant hired by management last year for 6 months which helped in improving the performance of blast furnace which helped in terms of fuel, cost and productivity.
- ❑ Better spread in 1QFY20 is not expected as compare to 4QFY20 performance. In April it was completely washed out and from May it was started production with one blast furnace.
- ❑ Order book for DI pipe facing problem from last year onwards due to COVID which reduced volumes along with the market of DI pipe de-grow.
- ❑ Odisha, Maharashtra, Haryana are the states for orders coming in for DI pipes in FY21.
- ❑ Order book for the next 8 months lined up by the management and it came down a bit due to last two months.
- ❑ UP, MP, Odisha, Jharkhand, AP are showing optimism in terms of order book yet there are states like Maharashtra declared they have no money. However, management is waiting how much of it will convert it in terms of money.
- ❑ Collections are hardly there in the months of April. However, Collection is not a problem, there are no bad debt yet there is delay in payments of 1-2 Months.
- ❑ Net Debt position is Rs. 200 Cr. in 4QFY20.

#### **CAPEX Update**

- ❑ Expansion plan for DI pipe delayed by around 6 months due to imported equipment which is mainly from China and it was the first country stuck with COVID and had lockdown.
- ❑ Delay in the expansion plan is based on factors like supply, manpower (project labour) etc.
- ❑ CAPEX spent in Oxygen injection plant commissioned has discounted payback period will be around 5 years.
- ❑ PCI plant has spent around Rs. 50 Cr. has discounted pay-back period of 2.5 years.
