Market Outlook

Yesterday, Nifty opened negative at 10235.55 and made a low of 10194.50. From there it moved towards the high of 10361.80 and closed negative at 10288.90 levels. Broader indices traded mix as FIN SERVICE, FMCG, PHARMA and PVTBANK close positive, whereas MEDIA, AUTO, REALTY, PSU BANK, METAL and IT close with negative bias. India VIX closed positive by 1.52% at 30.02.

Index witnessed roller coaster ride between North and south block. After opening with negative bias, nifty showed resilience and formed small bull candle on daily chart. If it is able to defend the level of 10090, then bounce back is expected towards 10360 and 10440 levels. However, break below 10090 can induce selling pressure till 10020 level (100 SMA).

Quote of the Day : "I would not pre-pay. I would invest instead and let the investments cover it"

BANKINDIA**ACCUMULATE****26-Jun-20**

Bank India posted a mixed bag quarter Healthy Loan book and deposit front along with the improvement in the asset quality with both GNPA and NNPA levels coming down with reduction in slippages. The SMA 1 and SMA 2 of the bank for exposures of 5 Cr and above is around 4000 Cr from around Rs 10000 Cr in FY19. The pre provisioning profit growth was steady. The Specific PCR levels of the banks are around 77%. However the profitability of the bank was dampened during the quarter on account of the Higher provisions made on 6 NPA accounts out of which 2 constituted Rs 3700 Cr itself. The 46% of the banks domestic book in terms of value is under moratorium and 41% in terms of number. We give accumulate rating on the bank with TP of 61 at 0.45XFY21E

ASIANPAINT**HOLD****25-Jun-20**

In 4QFY20, volumes from decorative business remained impacted due to outbreak of COVID-19. As of now the company has started operations at all plants except those which are in containment zone with current production level at 60-70%. As the decor and painting comes under discretionary item we expect the demand for painting and re-painting the homes will remain muted at-least in near term due to lower disposable income and higher spends on essentials while some demand are expected from waterproofing and adhesives category with the advent of monsoon as these becomes the essential. The company initiatives like safe home initiative will ensure all safe measures to be undertaken at the time of painting. The company JV (PPG-AP) and Home improvement are expected to remain muted due to slow down in automotive and real estate space on the other hand exterior textures, smart care waterproofing, adhesive, value portfolio and surface sanitizer which the company has launches are expected to show positive trends. On realization front, in order to pass on the benefit of benign input price the company undertook a price reduction to the extent of ~1% in FY20 and may further pass on the benefits in coming months. On margin front, benign raw material prices will further aid to margin expansion and company may pass the benefit to consumers in coming quarter. Thus considering the above statement we remain positive on stock and maintain our HOLD rating with target price of Rs. 1800.

BANKBARODA**ACCUMULATE****25-Jun-20**

Bank growth has been above the expectations despite the challenges faced in the economy and stress in the corporate accounts earlier. Going ahead as well there may be challenges in retail book growth on the COVID-19 impact but other segments like corporate, SME and Agri are likely to do well. Asset quality has shown sign of improvements but there is still some stress expected from retail book going ahead. Margins are likely to little contract further but lower OPEX will add to the growth going ahead. We expect near term profitability to improve on the account no stress expected from corporate book and improvement in OPEX. Expected Capital raising in 2QFY21 of Rs 4500 Cr will further add to the growth going ahead. WE value stock at 0.4x BVFY21 to arrive at target price of Rs 64 and maintain ACCUMULATE.

BALKRISIND**BUY****25-Jun-20**

The management seems bullish on agriculture sector as it continues to outperform overall economic activities across geographies (especially in Europe/India). The US market has also started picking up after trade war. Indian market continues to remain a focus area with 20% revenue contribution and the management plans to reach 25% contribution in next 2 years. The company has also become self-reliant in terms of carbon black sourcing as the second plant also commissioned in March 2020. Margins are expected to remain in the range of 28-29% based on softness in commodity prices and backward integration from carbon black plant. Factoring the strong demand across geographies and better margin guidance, we increase our FY21 PAT estimates by 23%. We value BALKRISIND at 26x FY22e EPS to arrive at a target price of Rs.1471 and maintain BUY.

LICHSGFIN**NEUTRAL****23-Jun-20**

Individual home loan portfolio continues to drive the growth of the company. Developer and LAP remained sluggish as the company is being very selective due to the current environment. Margins remained under pressure on the account of lower yield and may remain the same going ahead. OPEX remained high. Asset quality continues to deteriorate further. 25% of the book is under moratorium. Given the current Scenario of lower growth in almost all the segments, profitability will likely to be moderate in the near term, however, LICHSGFIN is currently trading at lower valuation band of 0.75 x BV on FY21e. but due to deterioration in asset quality, lower margins and low asset growth we give NEUTRAL rating with reduced target price of Rs 296.
