ITC	BUY	08-Jul-20

ITC is trading in a rising wedge every since it made a bottom near 134 levels and upper trend line comes near 220 marks. Recently it has given golden crossover and as per the setup prices should move up towards higher pivot points in short-term and mid-term as well. TATAMOTORS BUY 03-Jul-20

Daily chart of stock reveals that demand is increasing and supply is diminishing as stock is taking support from line of parity showing rebound from its lower levels. Prices took support from the base of cup and handle price pattern suggest the possibility of pullback. Moreover, one larger degree cup and handle pattern formation is in progress which can give breakout above 119 levels which is also giving bullish tone in the stock. Stock needs to close above 109 marks for accelerating up move with ease. With the chart looking attractive and decent volume participation witnessed, we recommend a buy around 105 in this stock for an upside target of 120/130, keep a stop loss of 89 marks.

PNB	BUY	03-Jul-20

This Scrip spurted from a low of 26 after forming cup and handle pattern, it showed pullback on upside marked the high of 35.50 marks and started consolidating there. Currently, it is waiting for another breakout on upside so that it can accelerate buying momentum further. Line of polarity on daily time frame of chart standing around 34 is suggesting bullish momentum in the scrip. Indicators and oscillators are also showing conducive scenario in the coming sessions. So based on the mentioned technical structure one can go long in the scrip around 36 and lower towards 32 for the target of 45/52 marks keeping a stop loss of 28.50.

Nifty Weekly 20-Jul-20

VIEW

Domestic market has traded much on the expected line although indices were on roller coaster mode as the benchmark swung sharply on both sides but finally ended with modest gain. Progress in vaccine, conducive global cues and good earning report from wipro and Infy has helped the market to bounce back from lower levels. Near term of Nifty seems to be positive and follow thru buying can further accelerate the momentum on upside.

Technical Outlook-

- a) Index smartly recoiled in the last two days of week which depicted a Hanging man formation on weekly chart suggest a caution at higher levels
- b)But daily chart is looking impressive as prices are still sustaining above all its significant moving averages
- c) Positive set up near rising line of wedge indicating power in the hand of bulls
- d) Also momentum indicator stochastic has shown a bullish crossover which suggest positive bias in index
- e) Immediate resistance stands at 10935 above which it can extend gain up to 11035 and 11250 levels
- f) Possibility of weakness is only possible below 10560 level while intermediate support lies at 10700 levels.

USDINR Weekly

20-Jul-20

VIEW

In line with our projection, Bears won the battle and retained the upper hand in USDINR pair trading. Strong rebound in equity market and foreign fund inflow helped rupee to gain strength. Persistent FX purchases by the central bank will help to adjust the volatility in the currency market. However, there still exist concerns from coronavirus and ongoing tension between US & china which will keep the market on edge. All in all, the pair may continue to trade while exhibiting a bearish bias over the coming days. The decline may not be steep and intensive but the upside, if it arises then it will remain capped.

TECHNICAL FACTORS-

- a) Little bounce back was seen in the pair which eventually fizzled out near its key resistance
- b) Emerging Head and Shoulder pattern is seen on daily chart which signal the presence of bears
- c) Construction of right shoulder below negative crossover of 20 & 50 SMA suggest downward move
- d) Prices are tagging the lower bollinger band in shorter time frame of chart and negative curve has seen in momentum indicators
- e) Technical breakdown is expected below 74.45 and pair can slip down till 73.90 and 73.45 mark
- f) A decisive close above 75.70 mark will invalidate the impact of H&S pattern
