## Higher other income and reduced tax boosted PAT

## 1QFY21 Result Update

- In 1QFY21, BAJAJCON reported numbers better than our expectations; Revenue declined by $18.4 \%$ YoY to Rs. 196 cr. impacted on account of complete lock down in first 15 days of 1QFY21 amidst COVID-19 outbreak.
- The Company's ADHO volumes declined by $23.5 \%$ YoY due to shut down of operation in first fortnight of 1QFY21, urban slowdown on account of lock down in containment zones, slowdown in modern trade channels due to shut down of malls and hyper markets. Thus all the above factors impacted sales in 3QFY20.
- The Company launched sanitizers in various SKU's under its Nomarks brand in order to meet the increasing demand of sanitizers on the wake of COVID-19. During the quarter sanitizer contributed to the extent of high single digit as $\%$ of total sales.
- Gross margin declined by 330 bps to $64.4 \%$ YoY impacted on account of adverse impact of product mix which included the launch of sanitizers while EBITDA margin declined by 31 bps to $29 \%$ YoY led by lower other expense.
- The Company reported PAT of Rs. 54 cr . (vs. expect. of Rs. 42 cr .) with PAT de-growth of $7.61 \%$ YoY and PAT margin at $27.6 \%$ YoY. PAT remained on higher side on account of higher other income and reduced tax rate.

## View and Valuation

BAJAJCON has reported numbers better than our expectation despite the prevailing turbulence of COVID-19. As of now the company has started its operation and is working at full capacity. Going forward on demand front, rural demand is expected to remain higher than urban demand. The Company is focusing on increasing its rural reach as of now in order to ensure availability of ADHO. Sanitizers which the company had launched in 1QFY21 are also expected to show upwards trend amidst increasing rate of COVID cases. For the company. On trade channel front, with the opening up of lockdown in various states we expect positive movement from general trade channel while Modern trade channel is expected to remain muted and will stabilize with urban market stabilization. EBITDA margin is expected to remain impacted due to higher other expense on account of $A d \& P$ expenditure (will decide A\&P spends on fort night basis due to current prevailing situation) while benign input prices is expected to provide some cushion to margins. On PAT front, lower tax rate will ensure increased profitability. Thus, considering sluggish urban growth and current uncertain situation of lock down have kept our estimates unchanged and maintain our HOLD rating with a target price of Rs. 189.

## Key Risks to our rating and target

- Extension of Lock down in COVID-19 affected regions.
- Steep increase in A\&P expense.
