Market Outlook

Once again nifty witnessed profit booking after reaching near its swing high. Index has been forming indecisive candle from last four days in a row suggesting a sudden sell off. But a gradual decline in VIX from its recent bounce suggest bulls are using every decline as a buying opportunity and the overall trend could remain bullish for a potential range breakout. A decisive close above 11350 can instill confidence among bulls for the next leg of move towards 11450-11500 zone. Support move up to 11200 followed by 11125 mark.

MUTUAL FUND - INFLOW**MACRO****11-Aug-20**

Equity Mutual Funds inflow decline for a 5th consecutive month in July-20. The Equity Mutual Funds saw highest net outflow in 6 years. Outflow for the month of July stacked up at -2480 crores. With a sudden rally in the market post covid-19 the investors have rushed to book profits which has led to such high redemptions in the equity mutual funds. Net redemptions in equity mutual funds rose to a 4-month high of Rs.16622 crores up 22.9% from Rs.13520 crores in June. The Systematic Investment plans have also been badly impacted in the current pandemic due to restricted cash flows for a number of households. The SIP inflows for July stood at Rs.7830 crores after reporting Rs 7927 crores in June. Net Inflows from Debt Funds stood at Rs.91391 crores. The number has been unusually positive given the market sentiments towards debt funds a few months ago. Noticeably high investments have been garnered by Corporate Bond Funds and banking & PSU funds who enjoy a high credit rating and invest in AAA & secure assets. Corporate Bond Funds and Banking & PSU Funds have seen the inflows at Rs. 11910 crores and Rs.6323 crores respectively

CIPLA**NEUTRAL****10-Aug-20**

CIPLA's overall revenue for 1QFY21 came in-line, growing 9% YoY at Rs.4346 crs. EBITDA margin expanded on account of cost optimization efforts & lower on-ground activities this quarter. Going forward, we believe to see growth across geographies. The one-India strategy will continue to drive synergies across the three businesses i.e. Rx, Gx & CHL, along with this as the clinics & OPDs starts opening up; the Domestic business will contribute significantly. The growth in the US business will be supported by ramp up of Albuterol & other differentiated products in the pipeline. The other markets like South Africa & Emerging markets are well placed to contribute towards overall growth for the company. With the strong execution on the cost optimization & cost savings on account of lower marketing activities in 1QFY21 driven by Covid led lockdown, we expect to see significant margin & profitability expansion in FY21. On the regulatory front, the company is working towards resolving the observations by USFDA for the Goa manufacturing plant, and has recently submitted its response. Therefore, we maintain NEUTRAL stance with a target price of Rs.795 at 28x FY22E EPS.

EMAMILTD**HOLD****10-Aug-20**

EMAMILTD's 1QFY21 numbers remained impacted due to lockdown amidst pandemic with volume decline of 28% YoY. Going Forward, the company's healthcare, Boroplus and Pain management range are expected to grow led by high consumer divergence amidst COVID-19, further the company has already launched 12 new products and will continue to bring in more new products (20-30 new launches) in the categories while discretionary portfolio are expected to remain subdued for medium term on account of liquidity stress and lower disposable income. On the trade channels front, wholesale and rural channels are growing while retail and MT are still under stress due to vertical lockdowns in many places. On the margins front, benign input prices coupled with company's cost saving measure and Ad & P spends rationalization will ensure margin expansion. Considering the above statements and prevailing macro-economic scenario of vertical lockdown we maintain our HOLD rating on the stock with a target price of Rs. 274.

M&M**ACCUMULATE****10-Aug-20**

The farm equipment segment will continue to perform well on the back of strong rural sentiments led by strong kharif sowing and increased reservoir levels. The company's revenue share from rural market increased from 56% to 61% in 1QFY21 on sequential basis. Though, automotive segment may take next couple of quarters to revive led by supply constraints as well as lock downs in some cities. Development of new platform and new products in collaboration with Ford will further boost the profitability. Going ahead margins are also expected to remain in 12-13% considering favorable commodity prices and cost cutting measures taken by the company. We increase our FY21e EPS estimate by 10% because of cost control measures and strong farm equipment volume. We value standalone business at 12x FY21e EPS and subsidiaries at Rs.232 per share to arrive at a target price of Rs.646 and recommend ACCUMULATE.

ALKEM**NEUTRAL****10-Aug-20**

The overall revenue for ALKEM grew by 8% YoY despite Covid-related challenges prevailing in the market. The strong growth in US & other International markets have offset the impact of weak Domestic growth. The EBITDA margin has seen a significant growth from 14.3% in 1QFY20 to 26.6% in 1QFY21 based on superior revenue mix, savings on marketing activities & travelling expenses. The India business stayed impacted this quarter on account of lower prescription, with revival seen in the month of July. We expect the Domestic business to still see the impact of lower prescription in Q2FY21, with normalcy expected in Q3 & Q4. The US business will continue to grow on the lower base with 10-12 decent launches expected in FY21. The cost savings on account of lower sales promotional activities & travelling on account of Covid driven lockdown in Q1FY21 will help in the significant margin & profitability expansion for the full year. Therefore, we believe the current valuation adequately factors earnings potential over the medium term. Hence, we reduce our rating from BUY to NEUTRAL with a target price of Rs. 2983 at 22x FY22E EPS.
