Quote of the Day : "The four most dangerous words in investing are: 'This time it's different.'"

**MUTHOOTFIN****HOLD****20-Aug-20**

The loan book has registered a better growth of 15% YoY on the back of strong rural demand and growth came from gold loan book majorly. The management is looking at 15% growth for FY21. Collections in non-gold loan portfolio have significantly improved month on month. The operating expense is expected to remain under control going forward. We remain optimistic about the stock as the macroeconomic factors are expected to result in increased preference for gold loan financing and even though the cost of funds is trending at a higher range but management has been able to pass on the hike in cost and expects the margins to be maintained at current level. We maintain our estimates for FY21E and value the stock at 4.1X P/B FY21E at target price of Rs 1329 and give HOLD rating.

**ASHOKLEY****ACCUMULATE****19-Aug-20**

The management believes CV industry to perform strong and expects positive pressure on volumes from 3QFY21 onwards. The company has robust plans to launch new products from modular platform in the near future. The management expects LCV volumes to catch up early as compared to MHCVs. Going ahead, the margins may expand based on better product mix, operating leverage and new modular platform. However, increased debt levels may impact on overall profitability. We value standalone business at 25x FY22e EPS and Rs.9 per share for HLFL to arrive at a target price of Rs.79 and recommend ACCUMULATE.

**BALKRISIND****ACCUMULATE****19-Aug-20**

The demand in the agri tyre segment is better based on good monsoon in the European markets. Based on that the management has maintained its FY21 volume guidance and it will be similar to FY20. The company has also gained market share in European markets because of its strong brand positioning. Further margins are expected to be in the range of 27-29% considering the favorable commodity prices as well as captive carbon black plant. The management continues to focus on Indian market and expects Indian contribution to increase to 25% from 21% currently in next 2 years. We value BALKRISIND at 24x FY22e EPS to arrive at a target price of Rs.1431 and maintain ACCUMULATE.

**BERGEPAIN****NEUTRAL****18-Aug-20**

BERGEPAIN 1QFY21 business remained impacted due to nationwide lockdown amidst pandemic. The Company's domestic business remained impacted due to complete washout in April which in turn impacted the standalone business. Going forward, the company is receiving good response from Tier III and Tier IV cities as they remained less impacted due to COVID and also the government initiatives to uplift rural will favour demand from these regions while Tier I cities and metros are still under stress due to extended lock down in many regions. The prices are expected to remain stable. On the international business front the subsidiary in Poland is performing well on the back of different nature of business which comprises of application of external insulation on building sites while Nepal remained impacted due to lockdown for almost entire quarter (operated for only 10 days in 1QFY21). On the Margin front, margin expansion is expected to be driven by benign input prices, use of low cost inventory coupled with cost saving measures undertaken by the company while currency fluctuation risk will continue to pertain as the company imports some of the raw materials and also the company's focus to push value portfolio may reduce the margin expansion. Going forward after considering the below average performance amidst operational disruption, slowdown in slowdown in tier 1 cities, stress in demand, labour unavailability we maintain our NEUTRAL rating on stock with a target price of Rs. 404.

**MGL****BUY****18-Aug-20**

MGL's overall revenues declined by 65% YoY this quarter due to lower volumes in the CNG segment as there has been a drop in the movement of public transport like Autos, buses & taxis on account of Covid'19. The PNG –Industrial/Commercial segment has declined by 49% as the restaurants & commercial establishment has still not commenced its operation, the PNG domestic segment on the other hand has improved by 7% YoY. Going ahead, we expect to see gradual improvement in the CNG & PNG –Industrial/Commercial segment as the vehicular movements normalizes & commercial establishments and restaurants starts opening up. The delay in the ongoing projects due to non-availability of labours & restriction in the movement will be the only key concern area in the short term. Therefore, we increase our rating from ACCUMULATE to BUY with target price of Rs. 1218.
