Quote of the Day : "The four most dangerous words in investing are: 'This time it's different.'"

GILLETTE	NEUTRAL	28-Aug-20
<p>GILLETTE's numbers for 4QFY20 remained better than expected despite nationwide lock down amidst COVID-19. Despite 24.4% YoY decline in sales the company managed its PAT well by reducing operating costs. Gross margin expansion was driven by benign input prices while EBITDA margin expansion was on account of steep decline in Ad & P spends and other expenses. In the near term we expect demand from the grooming segment will remain subdued to some extent on account of working from home formats while shut down of some modern trade channels, vertical lock-downs in many cities are also expected to impact top-line. Thus, In the long run we remain positive on stock but considering prevailing concerns such as vertical lockdown and rising number of disease cases we maintain our NEUTRAL rating with a target price of Rs. 5361.</p>		

CANFINHOME	ACCUMULATE	28-Aug-20
<p>Loan book growth has been moderate in last few quarters on the account of stress in housing finance sector as well as COVID-19 shut down but company did well in the same period also and deliver good results. Due to the lockdown since March 25, 2020, the operations of the Company were restricted. Loan disbursements were not made during April 2020, May 2020. Business resumed in many Centers during last week of May 2020. So there may be some impact on asset quality in near term but going ahead it will settle in next 4 quarter. NPAs in SEMP segment will surge going ahead. Margins are likely to be maintained at more than 3% as cost of funds is declining and yields will be settled accordingly. The company has plans of raising capital in FY21. We value the stock at 1.8x BVFY22e to arrive at the target price of Rs 419. Recommend to ACCUMULATE.</p>		

MINDAIND	HOLD	27-Aug-20
<p>The industry has seen gradual recovery in retail demand and the production levels have also reached to ~90% of previous year levels. The management expects better festive season led by positive rural sentiments and improved preference for personal vehicles. New product launches in premium segment with improved kit value, client addition through new acquisitions and huge localization opportunity in the alloy wheel segment (65% imported) will improve the realizations and margins going ahead. We value the stock at 26x FY22e EPS to arrive at a target price of Rs.381 and recommend Hold.</p>		

MUTHOOTFIN	HOLD	20-Aug-20
<p>The loan book has registered a better growth of 15% YoY on the back of strong rural demand and growth came from gold loan book majorly. The management is looking at 15% growth for FY21. Collections in non-gold loan portfolio have significantly improved month on month. The operating expense is expected to remain under control going forward We remain optimistic about the stock as the macroeconomic factors are expected to result in increased preference for gold loan financing and even though the cost of funds is trending at a higher range but management has been able to pass on the hike in cost and expects the margins to be maintained at current level. We maintain our estimates for FY21E and value the stock at 4.1X P/B FY21E at target price of Rs 1329 and give HOLD rating.</p>		

ASHOKLEY	ACCUMULATE	19-Aug-20
<p>The management believes CV industry to perform strong and expects positive pressure on volumes from 3QFY21 onwards. The company has robust plans to launch new products from modular platform in the near future. The management expects LCV volumes to catch up early as compared to MHCVs. Going ahead, the margins may expand based on better product mix, operating leverage and new modular platform. However, increased debt levels may impact on overall profitability. We value standalone business at 25x FY22e EPS and Rs.9 per share for HLFL to arrive at a target price of Rs.79 and recommend ACCUMULATE.</p>
