Market Outlook

Yesterday, Nifty opened positive at 12023.45 and made a high of 12025.45. From there it moved towards the low of 11661.30 and closed negative at 11680.35 levels. Broader selling was witnessed in all the sectoral indices. India VIX closed positive by 9.14% at 22.05

Fresh lockdown in Europe due to the second wave of coronavirus and fading hope of further stimulus in the US triggered heavy correction on D-Street. Formation of Bearish engulfing on daily chart indicate more room for correction but market will try to stabilise near 11580-11600 zone. As of now resistance has shifted lower towards 11790 followed by 11900 levels on upside.

|------|-----|-----------|
| INFY | BUY | 15-Oct-20 |
|------|-----|-----------|

Consecutive improvement in revenue based on multiple dimensions like digital scaling, large deal wins, continues account expansion, strong client matrix, very strong Q1. Based on the above parameters; management has revised and increased its revenue growth guidance to 2-3% YoY in CC terms. Margin expansion in 2Q achieved after rewarding employee 100% variable pay and one-time special bonus. Margin guidance also improved for FY21 to be in the range of 23-25% (vs 21-23% earlier). On account of healthy pipeline and robust large deal win in 2Q will become growth factor going ahead. We value our stock at Rs. 1254 valued at 26 times FY22E EPS, recommend to BUY.

| | | |
|-----------------|-------------|-----------|
| WIPRO - Buyback | PARTICIPATE | 14-Oct-20 |
|-----------------|-------------|-----------|

Wipro is a leading global information technology (IT), consulting and business process services (BPS) company. Based on previous Buyback offer of WIPRO, we assume that around 35% shareholders in retail segment shall tender their shares and hence acceptance ratio can come to around 75%. This generates an expected return of 13.1% assuming post buyback price to be Rs 415. Fundamentally we have Buy rating on the stock. However, we recommend investors to participate in Buyback offer for short term gain.

| | | |
|-------|-----|-----------|
| WIPRO | BUY | 14-Oct-20 |
|-------|-----|-----------|

Sequentially improvement in demand along with robust pipeline of deals both medium as well as large leads to revenue growth of 3.7% QoQ in rupee terms and 2% QoQ on CC terms. Positive movement in volumes helps in 2Q and will become a growth factor for 3Q revenue. Consecutive margin expansion led by operating leverage benefit despite rupee appreciation and employee hiring. Interaction of management with customer and partner will built strong relationship going ahead. We recommend to BUY the stock with the target of Rs. 415 valued at 22 times FY22E EPS.

|-----------|-------|-----------|
| IIP & CPI | MACRO | 13-Oct-20 |
|-----------|-------|-----------|

The Index of Industrial Production for the month of August 2020 declined by 8 per cent. The decline was mainly due to slow output from manufacturing, mining and electricity generation. The IIP for the April-Aug period stood at -25% as opposed to 2.4% in the same period during the previous year. Mining activity, manufacturing activity and electricity generation saw de growth at 9.8%, 8.6% and 1.8% respectively. Consumer Price Index for the month of September 2020 further jumped up to 7.34% as opposed to 6.69% a month ago. Key inflationary trends in the food index could be seen in Vegetables (20.73%), Pulses & Products (14.67%) and Meat & Fish (17.60%) due to supply constraints still prevalent in many parts of the country. Food Inflation has however eased down from last month's 10.68% to 9.05% in the month of September. The Consumer Price Index mainly pained by higher food and personal care prices has also a base effect impact for the higher inflationary trends. We believe the CPI to ease out by the end of the calendar year. The Monetary Policy Committee has hence held the rate cuts as the supply shock pressures are still upbeat in the economy. The RBI may further cut rates only after the inflation falls below the RBI's comfortable band of below 6%.

| TCS | HOLD | 08-Oct-20 |
|-----|------|-----------|

Despite the challenging environment of COVID-19 the spending on technology and development by various sectors reduced still TCS managed to grow on account of BFSI and retail sector. Margin expansion based on lower employee cost while the salary hike rolled out and effective from October will create pressure on margins. Due to an exceptional item as provision of Rs. 1284 Cr. created against legal claim filed by Epic systems against TCS reduced bottom line 2QFY20. Strong growth aspect could be seen in near term based on the deal wins growth of 25% to USD \$ 8.6 billion. We value the stock at Rs. 2911 valued at 30 times FY22E EPS HOLD.
