Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened positive at 14,639.80 and made a all time high of 14,653.35. From there it moved towards the low of 14435.70 and closed positive at 14564.85 levels. On sectorial front profit booking seen in FIN SERVICE, REALTY and PHARMA, while rest of the sector traded with positive bias. India VIX closed positive by 1.94% at 23.29.

Bears made an effort to hold their grip on index but buying in the last hour of trade failed their attempt. Index has gained significantly in the short term and presently trading at all time high levels. Since the recent upward movement has been straight with out any retracement, so profit-booking at these levels cannot be ruled out and therefore investors should be cautious at these levels. Now the levels of 14700-14750 zone is crucial resistance and any formation of reversal candlestick pattern can lead to selling pressure. Immediate support lies at 14430 followed by 14380 levels.

MACRO

13-Jan-21

The Index of Industrial Production for the month of November 2020 moved back into the negative territory . The IIP for the month of November'20 saw a -1.9% growth.The IIP for the April-Nov period stood at -15.5% as opposed to 0.3% in the same period during the previous year.The Consumer Price Index for the month of December 2020 slumped to 4.59% as opposed to 6.93% a month ago. The Inflation took more than a year to settle below the 5% level.Key inflationary trends in the food index could be seen in Oils & Fats (20.05%), Pulses & Products (15.98%) and Meat & Fish (15.21%) due to supply constraints still prevalent in many parts of the country. Despite these inflationary pressures,the vegetable deflation has helped the food inflation to plunge.Retail food inflation drops to 4.59% in December'20 from 6.93% in November'2020.The Monetary Policy Committee has hence held the rate cuts as the supply shock pressures are still upbeat in the economy. The rising fuel prices will still be a worry and will set a hindrance for RBI to cut rates.The Union Budget will be a key lookout for the bond yield movements as the fiscal deficit numbers come out.

IEA_DMART

NEUTRAL

12-Jan-21

The company is back on track with strong revenue growth of 10%, showing strong performance in the quarter post unlocking of norms done across the country and driven by strong festive season and growing demand sentiment. DMART's operational and distribution efficiency is yielding strong results. However, the company is facing stiff competition from various players in the segment which may have an impact on the company's performance going ahead. The company's approach of controlled acceleration for DMart Ready (its e-commerce business) as against increasing customer's preference towards online retail may also become its constraint in coming times. Considering, the sharp & hasty increase in the price of the stock and valuations as per current scenario we value the stock at target price of Rs.2100 and continue the NEUTRAL rating.

IEA_TCS

HOLD

11-Jan-21

Despite the challenging environment of COVID-19 the spending on technology and development by various sectors pulled demand for TCS and managed to grow on account of BFSI, Healthcare and retail sector. Margin expansion based on lower employee cost while the salary hike was done during the quarter rolled out in 2HFY21 due to current pandemic. Strong growth aspect could be seen in near term based on the deal wins and the consumer spending on technology growing at a faster pace. We value the stock at Rs. 3299 valued at 32 times FY22E EPS HOLD.

IEA_Monthly Volumes

MACRO

04-Jan-21

Automobile industry saw strong volumes in the December month in spite of lower buying trend in the year end. PV and Tractor segment posted strong growth of 21% and 36% YoY respectively. The uptick in PV and Tractor segment was led by demand shift towards personal mobility, continued uptrend in agriculture and rising liquidity position of individuals across the country. 2W sector showed growth of 14% YoY led by festive season and discounts offered by few OEMS and 3W continued to decline and posted de-growth of 32% YoY respectively. CV sector after a while became positive and showed growth of 3% YoY driven by growth in logistics sector.
