Market Outlook

Yesterday, Nifty opened positive at 15,119.05 and made a high of 15,168.25. From there it moved towards the low of 14977.20 and closed negative at 15106.50 levels. On sectorial front profit booking seen in FIN SERVICE, FMCG, PVT BANK and METAL, while rest of the sectors traded with positive bias. India VIX closed negative by 1.62% at 23.95.

!! Nifty is trading in a tight range of 15000-15200!!

Benchmark Index traded in a tight range of 150 points entire day; however it has managed to close near previous days close indicating bulls are defending crucial psychological levels of 15000. Nifty took support from 5 DMA standing near 15000 marks and witnessed short covering in the last 30 minutes of the trading session which pushed it towards 15100 levels. Any decisive move only below crucial support standing around 15000 will give an early sign of trend reversal till the one has to opt for buy on dip strategy for higher targets of 15300.

Quote of the Day : "The big money is not in the buying and selling, but in the waiting."

JKCEMENT**NEUTRAL****10-Feb-21**

In 3QFY21, the company posted strong volume growth of 24% to 3.17 MT led by capacity expansion and better execution capabilities. Going Forward, cement demand is expected to pick up led by pick up in government infrastructure projects and demand from affordable and rural housing. On pricing front, the cement prices are expected to pick up in a range of 2-3% QoQ led by settling down of winters. On capacity expansion front, the company has announced the capacity expansion at panna, in Central India while OLBC and upgradation of Nimbahera Line No.3 are expected to get completed by 2QFY22. On the Margin front, due to rising trends in Pet coke the company has substituted pet coke with coal. The lower coal prices and efficiency from newer capacities are expected to provide some cushion to inflation in diesel prices. Thus, considering much performance than our expectation in 3QFY21, efficiency from new capacity, expansion into newer markets and demand pick up from infrastructure we have increased our Sales and PAT estimate for FY22e by 8%/6% but considering sharp run-up in share price and limited upside, we maintain our NEUTRAL rating with a target price of Rs. 2109.

BALKRISIND**ACCUMULATE****10-Feb-21**

The agri demand continues to grow strongly across geographies coupled with good pickup seen in industrial, construction and mining segment. The company continues to hold market share of 5-6% currently and it has a vision to reach to 10% of market share. Moreover, the recent capex plan of Rs.1,900 Crores for various brownfield and technology upgradation with a payback period of 6 years will further enhance the operational efficiency of the company and will aid to margins going forward. The increase in rubber prices may have negative impact on margins in coming quarters. We value BALKRISIND at 31x FY22e EPS and maintain target price of Rs.1873 and ACCUMULATE rating on the stock.

MUTHOOTFIN**ACCUMULATE****10-Feb-21**

AUM growth has been largely above our expectations on the account of strong performance from gold loan segment as it is the growth driver .The management is looking at 25% AUM growth for FY21 and at least 15% for FY22 .Margins have been better QoQ .Increased preference for gold loans is likely to further boost the growth of the company. OPEX has also been under control. We value the stock at 3.15 XFY22E to reach at target price of Rs 1333 with ACCUMULATE Rating.

LALPATHLAB**NEUTRAL****10-Feb-21**

LALPATHLAB revenue has shown significant growth of 38% YoY mainly driven by volume increase in Q3 and revenue from covid testing. Patient volume has increased from 4.8 lakh in Q3FY20 to 5.5 lakh in Q3FY21. Company is also working towards strengthening its digital services which is giving edge over its competition. It also continues to strengthen service delivery especially in area of home collection through franchise partners.It is opening two more reference labs in Mumbai and Bengaluru and is focusing on expanding in south and west India. The company has seen a sharp rise in covid tests in October and November while volume has declined since December. We expect contribution decline from Covid business in coming quarters while growth is expected in non-covid business. We value the stock at 59x FY22E EPS to arrive at a target price of Rs.2549 and maintain NEUTRAL.

MUTUAL FUND**MACRO****10-Feb-21**

The New calendar year saw continued outflows in the equity mutual funds in the month of Jan'21 to the tune of Rs.9253 crores. The outflows however have started to moderate in the last 3 months. The Indian markets have witnessed record high markets and the outflows are just on the back of profit booking by the investors. The contribution through Systematic Investment plans has been lesser than the previous month but still stays above the Rs. 8000 crore mark.This shows slow moderation in the SIP market as well and these numbers should stabilize in the coming few months. During the course of the last 3 months a lot of funds have recategorized themselves from Multi cap to flexi cap due to the updated SEBI norms. This uncertainty has also led to high redemptions in the flexi cap category. Net Outflows from Debt Funds stood at Rs.33408 crores. High outflows have been witnessed in the liquid funds.
