Nifty Intraday Chart

Market Outlook

Yesterday, Nifty opened in negative territory at 11311 & started drowning towards the low day low, during the closing session the bull took the strong grip on Nifty & started moving upside to hit the life time high & got closed in positive at 11356 levels with addition of 37 points. Nifty hit the high of 11366 & low of 11267 levels. On sectoral front FMCG , REALTY, PHARMA, IT, AUTO and METALS traded positive whereas PSU BANK ,PVT BANK, MEDIA and FIN SERVICE witnessed weakness & traded with negative bias. On volatility front India VIX fell down by -1.25% to 12.42.

Bulls started reckoning profit after an initial dip where as Bank lost steam after three days of gain. Indices continues to soar in the sky of uncharted territory and day by day support is sifting on higher side. The upside momentum is still intact and intraday dip is used as a buying opportunity. However, Nifty extending its move towards the upper end of rising channel which placed near 11400, failure to move above this resistance line can become cause of profit booking. Moreover, overbought level is seen in RSI indicating minor profit booking is round the corner before index resume its northward journey. As long as it sustains above 11250-11260 levels, bias will remain positive.

Quote of the Day : "Buy when everyone else is selling and hold until everyone else is buying. That's not just a catchy slogan. It's the very essence of successful investing."

INDIGO	"NEUTRAL"	1st August 2018
<p>The dark clouds of trouble continue to hover the entire Airline Industry. The industry over the last few quarters have turned highly competitive creating pressures on the yields. While on the cost side, the rising crude prices are posing threat to the profitability. The management in the earnings call opined that the current fare environment is highly unsustainable for the industry as a whole and INDIGO would still be in a better position in compared to its peers due to its low cost structure and strong Balance Sheet. The management said that they will have to remain competitive in pricing the fare even in an inflated cost environment. With the current macro environment of the industry, we remain cautious on the stock and value INDIGO at 5x FY20e EV/EBITDA to arrive at a TP of Rs.1000 and rate NEUTRAL</p>		
LUMAXIND	"BUY"	1st August 2018
<p>LUMAXIND has once again reported a strong operational performance with 100bps YoY expansion in EBITDA margin in 1QFY19. Net sales grew by 42%YoY to Rs.496 crores. This robust growth was supported by whopping 46%YoY sales growth across segments. The company maintained margins of over 8% for the consecutive 3rd quarter on the back of better product mix and operating leverage benefit arising on higher volumes. The management targets double digit margins through increasing localization and operating leverage benefit by FY20. The import content in LEDs remains higher so the management is working on to increase the localization going ahead. Considering the increasing usage of LEDs in automotives, the management expects LED contribution to reach 40% from 25% by FY20 and this will lead to 3x to 10x increases in realization based on technology. We expect revenue and PAT to grow at 16% and 43% CAGR over FY18-20, respectively. We value LUMAXIND at 17x FY20e EPS to arrive at a target price of Rs.2353 and recommend BUY.</p>		
GODREJCP	"NEUTRAL"	31th July 2018
<p>GCPL's number for Q1FY19 remained better than our expectations. Positive for this quarter, was 14% volume growth from Indian business and 10% CC growth from Indonesian business (after 7 quarters of muted growth). GCPL has regained lost market share in Indonesian business. Going forward, we expect better domestic revenue growth for GCPL led by new products launches and revival of rural economy. Implementation of Project PI and other cost efficiencies measures will help in maintaining and expanding margin going ahead. But considering recent run up in stock, we see limited upside for GCPL. At this price company is fairly valued. We recommend 'Neutral' rating for the stock with the target price of Rs 1320 (44x FY20e eps).</p>		
GSPL	"NEUTRAL"	31th July 2018
<p>GSPL has posted robust revenue growth of 26% YoY to Rs. 391 Cr but higher interest and tax has resulted in PAT de-growth of 5% YoY to Rs.144 Cr. Demand from City Gas Distribution, power and fertilizer plants remained robust in the last quarter due to complete fuel pricing and non-availability of coal in certain areas. Looking at the current market outlook, we expect demand from power sector to remain high because of lower gas cost as compared to alternate fuel and non-availability of coal. Expansion of City Gas distribution network in 11 geographies by GGL Ltd, is expected to add ~450-550 MSCM volume in next 2-3 years, which will improve the gas volume gradually. This gives us volume growth visibility at CAGR of 18% over FY18-20 to 126 MMSCMD in FY19 and 148 MMSCMD in FY20E. But considering delay in tariff revision and higher non-operating expenses, we remain cautious on this stock. We value the stock at 13.7x FY20e EPS and maintain NEUTRAL rating on this stock with the target price of Rs. 205</p>		
PERSISTENT	"ACCUMULATE"	31th July 2018
<p>PERSISTENT's posted a better set of numbers in 1QFY19 with revenue growth of 11% QoQ mainly led by recovery in IP revenue. Margin expanded 240 bps mainly due to INR benefit and operational efficiency but was offset by SG&A cost. PAT for the quarter stood at Rs 88 crore (growth of 19% QoQ). Going forward, we expect FY19 revenue growth to be better than FY18 on account of healthy pipeline in Services business (due to investments in few products), strong growth in IP revenue (grew 30% QoQ in 1QFY19) and continued traction in digital. However Digital business declined 1% QoQ in 1QFY19 due to completion of project and delay in ramping up of new deals. We still expect digital business to recover in future. Even the management expects digital business to return back to its 30% growth in future. Also, Accelerite business which declined in 1QFY19 is expected to improve in 2QFY19 on back of demand for new products and new project ramping up. On margin front, we expect wage hike to impact margins by 250bps in 2QFY19 however it could be covered over the year because of increased revenues. Even management expects overall 100bps of improvement in margin in FY19 as compared to previous year. Thus, we expect the company to post 14% revenue CAGR over (FY18-20E) and value the stock at Rs.947 (17x FY20e EPS) and recommend ACCUMULATE</p>		
AXIS BANK	"BUY"	31th July 2018
<p>Slippage remained elevated but assets quality showed an improvement due to higher recovery and write offs. Watchlist of BB and below rated pool increased due to aggressive downgrade but management seems to be confident of normalising it. Declining trend in BB and below portfolio will be key important for the bank. Recovery from NCLT cases will trigger the assets quality improvement going ahead. Management maintained the guidance of normalising credit cost in 2H FY19. PCR at 69% gives comfort. Improvement in NIM and higher recovery & up-grade will boost the earning going forward. Change in management will be key to watch. We maintain BUY on the stock with the target price of Rs 664 (2.1x P/BV FY20e).</p>
