### Nifty Intraday Chart

### Market Outlook

Yesterday, Nifty opened flat to positive at 11359.80, 5 points upside from the previous day close & rallied towards the life time high, but could not sustained over there & started retracing towards the low. During the closing session bull tried to take grip on Nifty but failed & closed in negative at 11346 by discounting -10 points. Nifty hit high of 11390.55 & low of 11313.55 levels. Nifty witnessed selling pressure due to profit booking after rising 400-points in the previous four consecutive sessions. On sectoral front FMCG , REALTY, PHARMA, IT, MEDIA and PSU BANK traded positive, whereas PVT BANK, FIN SERVICE, AUTO, METALS were in negative territory. On volatility front India VIX gained by 0.16% to 12.50 .

Nifty moved in the band of 10314-10390 throughout yesterday's trading session and closed the day after losing nearly 10 points. However the market's breadth was positive as 905 shares advanced as against 813 shares declined at NSE. Currently the index is moving in an upward rising channel and it reached near the resistance areas (10400-10425) of the channel. A gap was also left in between 10185 and 10210. Therefore some profit booking cannot be ruled out in the extreme short term.

**Quote of the Day** : "The best preparation for tomorrow is doing your best today."

**Monthly Auto Volume Update****2nd August 2018**

The automobile OEMs have reported mixed set of volumes in July 2018. Passenger vehicle industry sentiments remained subdued due to delay in monsoon in some part of the country and 8 day long transporters strike. On the other hand, commercial vehicle industry posted robust volume growth of 29%YoY on the back of strong infrastructure spends, rising e-commerce sector and increased rural consumption. 2 wheeler industry have also fared well with growth of 15%YoY led by strong sales of entry segment motorcycles. Demand for 3 wheelers remained buoyant and the industry posted volume growth of over 58%YoY. Tractor industry volumes grew by 13% YoY on the back of improving rural income and lower tractor penetration. There could be some concerns on the commercial vehicle volumes due to Axle norm related uncertainties in the near future. However, we expect that automobile industry will post healthy double digit growth in FY19 on account of growing infrastructure spend, successive normal monsoon, increasing rural income and new launches. Our top picks are ASHOKLEY, BAJAJ-AUTO, ESCORTS, HEROMOTOCO and M&M.

**MGL****"ACCUMULATE"****2nd August 2018**

MGL has posted better performance in Q1 FY19 as compared to last two quarters, with revenue growth of 16% YoY to Rs.676 Cr and PAT growth of 3% to Rs. 128 Cr. This is led by the 11% growth in overall volumes and higher realization. The price of the domestic gas has increased sequentially in the last 6 months to the extent of about 18%. The company has partially passed on this hike to its customers which has improved its gross margins by 200bps QoQ to 56.7% but margins were lower as compared to the same period of FY18. The company enjoys the pricing power and hence it may increase the prices of gas in all segments gradually which will improve margins going ahead. We believe that lower penetration of PNG, higher conversion rate of vehicles to CNG and increasing number of CNG stations will lead to the growth in volume over next couple of years. Considering this we expect volume to grow at CAGR of 9-11% over FY20-22 while revenue and PAT to grow at CAGR of 13% over FY18-20. We value the stock at 18x FY20e EPS to arrive at target price of Rs.1010 and recommend ACCUMULATE.

**DABUR****"HOLD"****2nd August 2018**

Dabur has reported strong domestic FMCG volume growth of 21%, best among other FMCG players led by broad based growth in all verticals. Oral care, Homecare, Hair oil, Healthcare, Digestives, and Beverages grew by 17.3%, 17.4%, 18.8%, 23.4%, 21.6% and 26.8% respectively. This quarter witnessed come back of Beverages segment and gain in market share in Chyawanprash and Honey. Going forward, we expect strong volume growth for domestic FMCG business to continue led by category tailwind, revival in rural economy and new product launches. We expect stable margin for the company backed by prudent pricing action and improvement in the International business margin. Considering strong volume growth, revival in rural economy, aggressive stance of management with increased ad ex. and better outlook of Namaste, we are positive on Dabur and recommend 'Hold' with the target price of Rs 460(43x FY20e eps).

**INDIGO****"NEUTRAL"****1st August 2018**

The dark clouds of trouble continue to hover the entire Airline Industry. The industry over the last few quarters have turned highly competitive creating pressures on the yields. While on the cost side, the rising crude prices are posing threat to the profitability. The management in the earnings call opined that the current fare environment is highly unsustainable for the industry as a whole and INDIGO would still be in a better position in compared to its peers due to its low cost structure and strong Balance Sheet. The management said that they will have to remain competitive in pricing the fare even in an inflated cost environment. With the current macro environment of the industry, we remain cautious on the stock and value INDIGO at 5x FY20e EV/EBITDA to arrive at a TP of Rs.1000 and rate NEUTRAL

**LUMAXIND****"BUY"****1st August 2018**

LUMAXIND has once again reported a strong operational performance with 100bps YoY expansion in EBITDA margin in 1QFY19. Net sales grew by 42%YoY to Rs.496 crores. This robust growth was supported by whopping 46%YoY sales growth across segments. The company maintained margins of over 8% for the consecutive 3rd quarter on the back of better product mix and operating leverage benefit arising on higher volumes. The management targets double digit margins through increasing localization and operating leverage benefit by FY20. The import content in LEDs remains higher so the management is working on to increase the localization going ahead. Considering the increasing usage of LEDs in automotives, the management expects LED contribution to reach 40% from 25% by FY20 and this will lead to 3x to 10x increases in realization based on technology. We expect revenue and PAT to grow at 16% and 43% CAGR over FY18-20, respectively. We value LUMAXIND at 17x FY20e EPS to arrive at a target price of Rs.2353 and recommend BUY.

**GODREJCP****"NEUTRAL"****31th July 2018**

GCPL's number for Q1FY19 remained better than our expectations. Positive for this quarter, was 14% volume growth from Indian business and 10% CC growth from Indonesian business (after 7 quarters of muted growth). GCPL has regained lost market share in Indonesian business. Going forward, we expect better domestic revenue growth for GCPL led by new products launches and revival of rural economy. Implementation of Project PI and other cost efficiencies measures will help in maintaining and expanding margin going ahead. But considering recent run up in stock, we see limited upside for GCPL. At this price company is fairly valued. We recommend 'Neutral' rating for the stock with the target price of Rs 1320 ( 44x FY20e eps).
